

A 14-POINT CENTERED TITLE FOR APiP 2016 ABSTRACTS IN BOLD CAPITAL CHARACTERS (TIMES NEW ROMAN OR TIMES FONT)

Author One*, Author Two#, Author Three*¹ (12-point, centered)

*Address of the Institution or Research Group (12-point, centered)

#Address of Author Two (12-point, centered)

The abstract must be in one column on a single **A4 page with no page number**, including all figures. The page must have a margin of 2 cm on all sides. All text, figures etc. must remain within these margins. The font used should be 12-point Times or Times New Roman, except for the abstract title, which should be in Times or Times New Roman 14-point bold capital lettering. The lines should be single-spaced and justified. For printing abstracts will be reduced to about 90% of their size. If using figures in colour, make sure that they are legible in black-and-white.

The abstract must begin with the title followed by the names of the authors and the addresses of their institutions. The title, authors and addresses should be centred on the page and separated by a single blank line from each other and from the main body of the abstract. The name of the author responsible for submitting the abstract (corresponding author) should be underlined, with the email address provided as a footnote. References must be numbered and enclosed in square brackets [1]. The list of references should be placed at the end of the abstract.

Abstracts must be submitted in the **PDF** format. Users of Microsoft Word can generate PDF files by exporting or “printing” and saving as a PDF file. Make sure that the output is an A4 page and the software does not default to US Letter. LaTeX users can generate PDF files directly using pdflatex. Alternatively, convert the dvi file to PDF using dvipdfm (with -t a4 option, to set the paper size to A4), or by generating a Postscript file (dvips -t a4) and then converting it to PDF using ps2pdf.

Abstracts will not be considered unless at least one of the authors is a registered participant.
